THE AI-NATIVE

Graph Intelligence Platform

From Data Silos, to Intelligent Connection MindGraph is an AI-native graph intelligence platform that unifies disconnected enterprise data into a single, trusted knowledge graph—understanding entities and relationships, reasoning over context, and generating recommendations teams can act on with confidence. It works as a foundational layer for your existing AI and analytics initiatives, or as a standalone intelligence platform, deploying on-premise, on-cloud, or fully air-gapped to keep your data and AI inference inside your network.

Core Differentiators

Beyond a Graph Database

Faster retrieval and more accurate insight

Enterprise World Model

One real-time knowledge graph, unifying all your data.

Open & Vendor-Agnostic

Any LLM, any data source, any tool—no vendor lock-in.

The Transformation

	BEFORE MINDGRAPH	AFTER MINDGRAPH
<i>Visibility</i>	• Siloed, Invisible	→ Connected knowledge graph
<i>Knowledge Discovery</i>	• Keyword search	→ Entity, relationship, semantic discovery
<i>Data to Insight Time</i>	• Hours/days	→ Minutes

Mindgraph in Actions

Fraud, Risk Detection & AML

Trace hidden relationships across accounts and transactions. Surface fraud rings rule-based systems miss.

AI Agent Memory & Reasoning

Persistent, structured memory for LLMs instead of scattered documents. Grounded via GraphRAG.

Customer 360°

Unify CRM, transaction, and support data into one connected profile for real-time decisions.

Supply Chain & Dependency Mapping

Map suppliers, products, and logistics as one graph. Spot failure points before disruption hits.

Mindgraph Features

- 01 Vector-Graph Fusion Engine
- 02 Knowledge Graph
- 03 Entity Resolution Intelligence
- 04 Correlation Engine

Deployment and Integration

On-premise

Hybrid

Air-gapped

Real-time sync

Data stays yours — sovereignty, control, and performance included
